DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements filed December 23, 2003, and April 29, 2004, fail to comply with 37 CFR 1.98(a)(3) because they do not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the crossed-out items have not been fully considered.

While all submitted prior art was located in the file wrappers of the parent applications, several non-English language items did not include a statement of relevance.

Drawings

2. Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, Applicant will be notified and informed of any required corrective action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/742,891 Page 3

Art Unit: 2622

Terminal Disclaimer

3. The terminal disclaimer filed on March 6, 2007, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of patents 5,699,173 and 5,793,517 has been reviewed and is NOT accepted.

The patent being disclaimed has been improperly identified since the number used to identify the 5,699,177 patent being disclaimed is incorrect. The correct number is 5,699,173.

Claim Objections

- 4. Claims 2, 4, and 6 are objected to because of informalities. Suggested corrections are:
 - In claim 2 on line 11, replace "nodule" with -- module --.
 - In claim 4 on line 11, replace "to." with -- to --.
 - In claim 4 on line 13, replace "inhibited" with -- inhibited. --.
 - In claim 6 on line 14, replace "module." with module --.

Appropriate correction is required.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re*

Application/Control Number: 10/742,891

Art Unit: 2622

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 6. Claims 2-9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 5 of U.S. Patent No. 5,793,517. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 2-9 are a broader recitation of claim 5 in the '517 patent. Therefore, the claims in the instant application are encompassed by claim 5 in the '517 patent. A terminal disclaimer is necessary so as to ensure that any two resulting patents are commonly owned throughout their lifetimes.
- 7. Claims 2-9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 9 and 21 of U.S. Patent No. 5,699,173. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 2-9 are a broader recitation of claims 9 and 21 in the '173 patent. Therefore, the claims in the instant application are encompassed by claims 9 and 21 in the '173 patent. A terminal disclaimer is necessary so as to ensure that any two resulting patents are commonly owned throughout their lifetimes.

Art Unit: 2622

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Whipkey, whose telephone number is (571) 272-7321. The examiner can normally be reached Monday through Friday from 9:00 A.M. to 5:30 P.M. eastern daylight time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivek Srivastava, can be reached at (571) 272-7304. The fax phone number for the organization where this application is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
